ZUSAMMENFASSUNG

Kurze Zusammenfassung des Inhaltes in deutscher Sprache...

*We have seen that computer programming is an art,
because it applies accumulated knowledge to the world,
because it requires skill and ingenuity, and especially
because it produces objects of beauty.*

INTRODUCTION

Personal fabrication devices, such as 3D printers, are already widely used for rapid prototyping and allow non-expert users to create interactive machines, tools and art. As consumer-grade 3D printers are usually desktop-sized, the size of these objects are, however, fairly limited. TrussDynamics aims to enable users to create large-scale dynamic objects using desktop-sized 3D printers.

COLOPHON

This document was typeset using the typographical look-and-feel classicthesis developed by André Miede and Ivo Pletikosić. The style was inspired by Robert Bringhurst's seminal book on typography "*The Elements of Typographic Style*". classicthesis is available for both L^AT_EX and L^yX:

Happy users of classicthesis usually send a real postcard to the author, a collection of postcards received so far is featured here:

Thank you very much for your feedback and contribution.

Final Version as of May 15, 2018 (classicthesis version 4.5).
